P.1 volcanoes

P.5 how volcanoes started

P. 8 volcano poem

Chapter 1: VOLCANOS

Volcano's are mountains but they don't have grass they are made out of bumpy rock. Also some volcano's erupt at different times! So be careful if you are on a volcano. If you are wearing a special suit that is lava proof you can go into a volcano! If someone can see a volcano about to erupt, they say "It's going to blow!" that means run for your safety and you'll be safe. If anybody says that volcano's aren't real just think there is such thing. If you live in England, you know there is no volcano here.

WARNING:

If you are 3 or under do not read this book

If you are near a volcano without a special suit ...RUN! Now the suits are lava proof because they are made out of special fabric and that fabric is lava proof!
There are 1,500 volcanoes in the world! If you didn't know that you know it now!

(c) Abet Llacer

Did you know that volcanoes have been around for 350,000 years!

The word volcano originally comes from the name of the Roman god of fire, Vulcan.

Hot liquid rock under the Earth's surface is known as magma, it is called lava after it comes out of a volcano.

Volcanoes are openings in the Earth's surface.

Here is a poem i made but it doesn't rhyme...

Volcanoes destroy your life but if you are not near them they won't.

On their time they like to explode.

Live your life,don't go near a volcano.

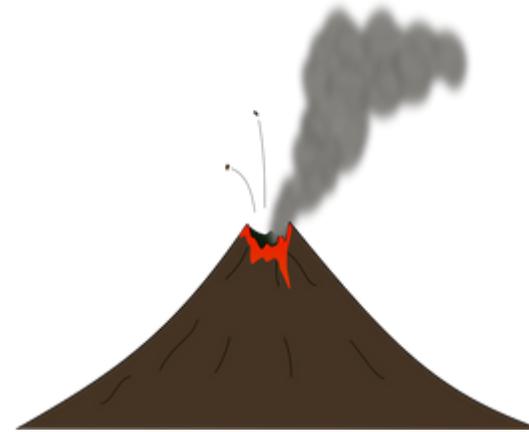

Can you survive?

Also, don't leave your baby or anybody's baby on a mountain because it might be a... VOLCANO!

Now don't go near a VOLCANO! I mean it.

Ok that is the end...of my poem.

Did you like it?

Here are some questions for you...
have you seen a volcano erupt? Do you want to see a volcano erupt? Have you seen a volcano erupt but your not sure about it? I wish you could answer my questions.

THE END
